A Resounding Success for the Region's Flagship Energy Networking Event

The third edition of the **Eastern Mediterranean Conference & Exhibition (EMC 2025)**, held on **20–21 October 2025** at the **City of Dreams Mediterranean in Limassol**, confirmed its position as the premier platform for advancing the energy dialogue in the Eastern Mediterranean. Bringing together government leaders, operators, investors, service providers, and innovators, **EMC 2025** served as a catalyst for partnerships, policy alignment, and investment toward a diversified and sustainable energy future for the region.

More than **240 delegates, 30 speakers, and 40 exhibitors** participated in this landmark two-day event, underscoring the East Med's growing global significance in energy security, decarbonisation, and technological innovation.

At EMC, every connection counts – each conversation, meeting, and handshake turns opportunity into action, making it the most influential networking hub for the East Med energy community.

Welcome message from the Ministry of Energy, Commerce & Industry

Ladies and Gentlemen,

I extend a warm welcome to all sponsors, delegates, exhibitors and visitors at the EMC |Eastern Mediterranean Conference & Exhibition. It is a privilege to have you with us and your presence enriches the vibrancy of this important event.

EMC is not just a conference and exhibition; it is a platform teeming with business opportunities, bringing together local, regional and international energy players. As the Energy Minister for the Republic of Cyprus, I take pride in seeing how this event has evolved into a nucleus for forging connections, exploring innovation and uncovering the myriad business possibilities that our region holds. The Eastern Mediterranean continues to rapidly evolve and the energy sector is at the forefront of this transformation. Our region's vast energy potential and strategic position make it a focal point for investors and entrepreneurs. Here at EMC, you will witness the incredible momentum that is propelling our region into a new era of sustainable energy production. It is a place where innovation and opportunity converge. I encourage you to make the most of your time at EMC and seize the potential it offers: engage in meaningful dialogue, explore collaborations and discover new solutions. This event is not only about today's state of play in the energy sector, but also about what tomorrow holds. The business opportunities that await you here are a testament to the bright future that we envision. As you navigate the corridors of EMC, remember that you are walking through a landscape of immense potential. Be open to new ideas, cultivate strong relationships and share in our vision for a sustainable and prosperous future for the Eastern Mediterranean.

Once again, a very warm welcome to EMC. I wish you inspiring discussions, fruitful exchanges and every success in all your goals and endeavors.

With best regards,

H.E. George Papanastasiou

Minister of Energy, Commerce and Industry of Cyprus

Welcome message from the Chair of EMC Advisory Board

I am pleased to welcome all Sponsors, Delegates, Exhibitors, Visitors, Supporters, and attendees in what is undoubtedly one of the most important energy events of its kind in the Eastern Mediterranean. On behalf of the EMC organizing team, I extend a warm welcome to the third edition of the Eastern Mediterranean Conference & Exhibition, here on the beautiful island of Cyprus.

The coming days will play a pivotal role in helping ourselves at this event to realize the true potential of sustainable energy production in the region, offering benefits to our people and global partners. With a plethora of C-Level attendees, Ministers, Operators, key stakeholders, and industry decision-makers in attendance, the third bi-annual EMC provides a unique platform to forge new business partnerships, assess our shared challenges, and engage in discussions that will shape the sustainable development of the hydrocarbon resources discovered in the deep offshore waters of Cyprus and the wider Eastern Mediterranean, and the further exploration that is to come.

We are collectively confronted with a range of unique strategic and technical challenges that, if left unaddressed, have the potential to impede the impressive developments in our subsea, offshore, and upstream infrastructure. EMC has been thoughtfully designed to tackle these challenges, and I urge you all to actively participate in the conference, meet and engage with industry colleagues old and new, and make the most of the opportunities to find new ventures, relationships and solutions. I wish you a wonderful and productive time on this beautiful island and a successful participation in the EMC event. Let us make the most of this critical moment to steer our industry towards a brighter and more sustainable future.

Prof. Toula Onoufriou

Chair of EMC Advisory Board

Head of EMERGE CoE Cyprus University of Technology

President of Cyprus Hydrocarbons Company

Thank you to our Sponsors and Supporters

EMC's success is built on collaboration with sponsors, partners, and supporters driving a shared mission to expand opportunities and strengthen networks across the Eastern Mediterranean energy landscape.

Attending Nations

With participation from multiple nations, EMC 2025 proved to be an international meeting point where global energy leaders converge to shape opportunities and strengthen regional ties.

Conference Highlights

Every session at EMC 2025 opened doors for networking, from ministerial dialogues to investor panels, creating new pathways for cooperation and cross-border business ventures.

Day 1: Policy, Outlook & Cooperation

Under the theme “Accelerating the Pace: Diversifying and Developing East Mediterranean Resources,” **Day 1 focused on the strategic outlook for the region.**

Following the opening welcome by Gavin Sutcliffe, Conference Director, and Prof. Toula Onoufriou, the morning plenary featured keynote addresses from:

- H.E. George Papanastasiou, Minister for Energy, Commerce & Industry, Cyprus
- H.E. Eng. Karim Badawi, Minister of Petroleum and Mineral Resources, Egypt

A Ministerial and Industry Leaders’ Dialogue explored regional energy diversification and investment priorities, with contributions from senior executives of eni, TotalEnergies, ExxonMobil, Chevron, and Energean, moderated by Wood Mackenzie.

Discussions covered gas monetisation opportunities, financing strategies, and the economic outlook for the region’s energy infrastructure (Poten & Partners and Clifford Chance)

Afternoon sessions explored regional cooperation, including how Cyprus and Egypt can advance LNG development, and how East Med gas aligns with European supply diversification (Gina Energy and Wood Mackenzie).

The day concluded with The Local Lens panel, where leaders from HEREMA, EMGF, CHC, SLB, and The Cyprus Institute addressed shared challenges and regional integration.

The evening EMC Executive Gala Dinner celebrated industry collaboration and innovation in an atmosphere of Cypriot hospitality.

Conference Highlights

Every session at EMC 2025 opened doors for networking, from ministerial dialogues to investor panels, creating new pathways for cooperation and cross-border business ventures.

Day 2: Policy, Outlook & Cooperation

By connecting technology innovators, project developers, and industry experts, EMC turned knowledge-sharing into collaboration – a powerful network for shaping the region’s energy future.

Day 2 shifted focus to technical excellence and innovation, showcasing cutting-edge projects and technologies driving the East Med’s upstream and offshore development.

Key presentations included:

- Energean & TechnipFMC: Operational insights from extended subsea tie-backs
- Eni: Design and operational challenges in deepwater and long tieback developments
- TotalEnergies: All-electric subsea systems and value creation
- Technip Energies & Wison New Energies: Floating LNG (FLNG) technologies and opportunities for East Med gas
- SLB OneSubsea: Subsea processing solutions enabling tie-backs and field optimization

The day concluded with a look toward the future through PROTEAS, the Cyprus Institute’s innovative hub for renewable energy research and testing, highlighting Cyprus’ growing commitment to sustainability and energy transition.

Egypt and Cyprus Strengthen Energy Cooperation with Landmark Gas Agreements: First gas from Kronos expected in 2027.

On **21 October 2025**, on the sidelines of the **Eastern Mediterranean Energy Conference and Exhibition (EMC)** in Limassol, **Egypt and Cyprus** signed a series of landmark agreements to advance the transfer of natural gas from **Cyprus' Kronos offshore field to Egypt**, marking a pivotal step in regional energy collaboration.

The agreements establish the **operational and commercial frameworks** for transporting, processing, and liquefying Cypriot natural gas through **Egypt's existing infrastructure**, setting clear provisions for supply and tariff arrangements.

The signing ceremony was attended by **H.E. Eng. Karim Badawi**, Egyptian Minister of Petroleum and Mineral Resources, and **H.E. George Papanastasiou**, Cypriot Minister of Energy, Commerce and Industry. Both ministers highlighted the strategic importance of the agreements in strengthening bilateral cooperation and accelerating the linkage between Cypriot gas resources and Egypt's gas network.

An initial **tariff agreement** for the **Kronos field project** was signed between the **Egyptian Ministry of Petroleum, Eni, and TotalEnergies**, which jointly operate **Block 6** under a 50-50 partnership.

A second **handling, processing, and transportation agreement** was signed by the **Egyptian Natural Gas Holding Company (EGAS), IEOC Production, Eni Cyprus, and TotalEnergies Cyprus**, outlining the technical and logistical framework for gas delivery from the field.

The Kronos field is estimated to hold about 2.5 trillion cubic feet of gas, with Egypt targeting 2027 to start receiving Cypriot gas for re-export to Europe. The two nations are also exploring ways to link the Aphrodite field—which holds around 3.5 trillion cubic feet of reserves—to Egypt's liquefaction plants to further expand export capacity to European markets.

Once operational, the project will enable Cypriot gas to be processed and exported through Egypt's LNG facilities, reinforcing the East Mediterranean's position as a cornerstone of global energy supply and cooperation.

A Platform for Collaboration and Innovation

Across the exhibition floor, major operators, service companies, and technology providers showcased the latest developments in exploration, production, digitalisation, and energy transition. Attendees engaged in dynamic networking sessions, bilateral meetings, and live demonstrations, turning ideas into actionable partnerships and fostering partnerships that will shape the next phase of energy development in the Eastern Mediterranean. Every exhibitor contributed to EMC's unmatched atmosphere of discovery and networking, turning the exhibition into a living hub of collaboration and commercial exchange.

Thank you to all EMC 2025 Exhibiting Companies

EMC Networking Dinner Where Business Meets Celebration

The **EMC 2025 Networking Dinner**, held on the evening of **20 October** at the **City of Dreams Mediterranean**, proved once again that networking at EMC is anything but ordinary. Far from being a traditional sit-down affair, the evening unfolded in true **Cypriot style**, a vibrant celebration of culture, connection, and collaboration. Guests were welcomed into an atmosphere alive with **music, dance, and Mediterranean warmth**, creating the perfect setting to build meaningful relationships beyond the conference hall.

Under the soft glow of Cypriot hospitality, **delegates, sponsors, exhibitors, and government representatives** gathered to share not only fine local cuisine and wines but also ideas, opportunities, and ambitions for the region's energy future. The evening's informal, engaging setting broke down barriers and encouraged genuine interaction, a reflection of EMC's spirit of community and partnership. The **EMC Networking Dinner** is more than a social highlight; it's a powerful extension of the conference itself where lasting professional connections are forged, collaborations take shape, and the shared vision for the Eastern Mediterranean's energy future is celebrated with joy and authenticity.

Because at EMC, networking is never just business — it's an experience.

B2B Matchmaking Programme

The EMC 2025 Matchmaking Event brought together 99 participants, both online and onsite, creating vibrant opportunities for networking and collaboration.

Over the course of the event, 90 meetings were held between registered companies, paving the way for valuable business connections. The hybrid format enabled broad participation and flexibility, welcoming attendees from diverse locations.

Organized by the Cyprus Chamber of Commerce and Industry (CCCI), coordinator of Enterprise Europe Network Cyprus and member of Digital Innovation Hub Cyprus, the matchmaking sessions effectively promoted cross-sector engagement and enhanced the event's international reach.

Participants praised the efficiency and organization of the meetings, noting the positive impact on their networking experience. Overall, the event delivered meaningful outcomes and was well received, underscoring its role in fostering new business opportunities at EMC 2025.

Acknowledgements

EMC 2025 extends its sincere appreciation to its **Silver Sponsors – Chevron, Eni, ExxonMobil, SLB, and TotalEnergies** for their steadfast support, and to **Wood Mackenzie** as the **Exclusive Knowledge Partner** for their valuable insights and expertise.

Gratitude is also extended to the **Ministry of Energy, Commerce & Industry of Cyprus** and the **Cyprus Hydrocarbons Company (CHC)** for their continued partnership and vision in hosting EMC 2025.

EMC's success is powered by partnership; every sponsor, supporter, and delegate plays a vital role in expanding this extraordinary network of regional and global collaboration.

Looking Ahead

As the Eastern Mediterranean continues to position itself as a vital corridor for global energy supply and transition, EMC remains committed to connecting people, policy, and innovation.

The next edition of the Eastern Mediterranean Conference & Exhibition will continue to build on this momentum fostering collaboration and driving sustainable growth for the region and beyond.

As EMC continues to grow, so does its network. Each edition builds stronger connections, broader cooperation, and greater business opportunities across the entire energy value chain.

"EMC is not just a conference and exhibition; it is a platform teeming with business opportunities, bringing together local, regional, and international energy players."

— H.E. George Papanastasiou, Minister for Energy, Commerce & Industry, Republic of Cyprus
